

Gorgeous 10mm fluted glass handrail for stairs

Here, we are seeing more and more customers looking to purchase bespoke fluted glass handrails for stairs, which is hardly a surprise due to their beautiful and contemporary nature! It means that your stairway will have an increased elegance from every angle, allowing your home to have the look of a modern glass staircase.

Fluted glass is identifiable by its vertical grooves. It's also known as textured glass, privacy glass, or ribbed glass. Is highly popular among architects and interior designers looking to add texture to space whilst diffusing light and adding an element of privacy. This allows light to pour into your home whilst giving an effective illusion that you have more space in your home than you actually do. Fluted glass handrails for stairs can add a contemporary touch to any home, style, and age, one of the main reasons why they are a fixture in so many modern homes of today!

fluted glass also called textured glass, privacy glass, or ribbed glass

What is a 10mm fluted glass handrail for stairs?

Our fluted glass handrails staircase panels are made with the most high-quality 10mm fluted glass around, to ensuring that not only will your glass balustrade look stunning, but can be backed up with substance! This glass will ensure that you have a safe and strong modern glass staircase installed in your

home.

We using carving or etching methods produced by glass engraving machines produce 10mm fluted glass Firstly design the patterns as your need in CAD drawing and input them into the computer, later transform the patterns into CNC engraving glass machines. The engraving machines will carve the glass and polish the lines to form the exactly designed patterns. In this way, all you have to do is to provide your requirement for the drawings.

Features of fluted glass handrails for stairs?

The vertical stripes will stretch the visual sense

fluted glass handrail is used in the home with such unique pattern characteristics, which can instantly stretch and expand the visual sense of the entire space, making the home larger and the vision stretched.

Does not affect daylighting

The characteristics of fluted glass make it not affect the lighting, with a little fuzzy feeling, like a distant

landscape painting, which makes people feel hazy and a little distant, with a sense of vagueness and high quality.

Coexistence of transparency and privacy

The surface of fluted glass retains the original transparency, and the use of embossing creates a frosted feeling, provides an opaque finish which is perfect for those wishing to bring more light into space without the use of fully transparent glass in their glass handrail

Create surprises for one-sided space

In a minimalist space with monotone or black and white as the main color, in order to make the glass handrail more fashionable and design sense. Through the glass handrails, the vertical texture in the plane is increased, so that the original plan space has a subtle interest.
