

Super safe CE certified 13.52 mm laminated glass panels for padel tennis court

What is a 13.52 mm laminated glass panels for padel tennis court

Laminated glass manufacturers as we are, providing excellent safety 13.52 mm laminated glass panels for a padel tennis court.

Our 13.52 mm padel glass is to combine two pieces of 6 mm tempered glass together with a 1.52 PVB interlayer. Comparing to single-tempered padel tennis court glass, laminated glass offers much higher strength with strong anti impulse functions. 13.52 mm laminated glass panels can reassure that the glass even break will not fall down to harm people, as the PVB interlayer will adhere the glass together preventing it to fall apart. Recently, more and more people use laminated glass panels as a padel glass court.

How do we manufacturers make 13.52 mm padel glass?

To produce tempered laminated glass panels, first, you have to cut the glass to your desired sizes and then polish the edges and place them into a tempering machine. After combining two pieces of 6 mm tempered glass together with a 1.52 mm PVB interlayer, transfer into a pre-press line and then place into high-pressure autoclave heating up to 100~200 degree temperature and keep 4~8 hours. To make the lamination high performance and endure a long lifespan.
