

# **CE certified VSG 21.52mm grey laminated glass price euro grey tempered laminated glass for railing supplier**

When people choose glass railing for their house, laminated glass might be the priority. Would you like to try grey laminated glass if you are tired of clear tempered laminated glass? Compared with monolithic tempered glass, laminated tempered glass offers more design options, from colors, shapes to safety performance. Glass railing systems have become a stylish, durable, and versatile design option.

## **What is grey laminated glass?**

### ***21.52mm grey laminated glass***

Grey laminated glass is also called grey tinted laminated glass. It is a kind of tempered laminated glass with a grey effect. There are two ways to produce it, two pieces of euro grey glass with clear PVB interlayer, or two pieces of clear glass with grey PVB interlayer. Both production methods make the PVB laminated glass look grey and hardly tell the difference.

Like all PVB laminated glass or [VSG](#), gray laminated glass is safety glass that has very high impact resistance and you are less likely to be injured even if it is broken because the glass shards stick to the PVB interlayer.
