

CE certified 8mm reeded glass railing 5/16 inch low iron fluted glass balustrade system toughened safety interior decorative glass railing

When making a choice on glass railing system for houses, many people will choose clear tempered safety glass. Clear glass is way too common and without decorative effect. Why not try decorative reeded glass railing or fluted glass railing? Decorative glass balustrade system has become a stylish design idea among designers.

What is low iron reeded glass railing?

Low iron glass is also called extra clear glass which is a type of glass with a lower iron oxide content. It looks less green comparing clear glass, even when multiple glass sheets are piled together.

Reeded glass is known for its beautiful and unique decorative effect. It is also called ribbed glass or fluted glass. It is pretty popular among architects and interior designers who want to add texture to a room while allowing light to pass through and providing some privacy.

Reeded glass can be made into [toughened safety glass](#)(ESG) and [laminated safety glass](#) (VSG) to achieve different requirements.

Product details

Shenzhen Dragon Glass
