

China good quality 331 clear laminated glass price, 6.38MM glass for sale

What are 331 clear laminated glass sheets (6.38mm)?

331 Clear laminated glass (6.38 mm) is part of the category "safety glass", with a total thickness is 6.38 mm. Made of two 3mm clear float glass, and between two glass is an 0.38 clear interlayer film. This glass lamination sheet is undergoing super high pressure in autoclaves with high temperatures and forms a permanent combination of the glass panels and the PVB material with the purpose to achieve superb silent functions.

When the glass is broken due to a strong impact, the broken pieces will still adhere to the PVB interlayer, leaving no harm to humans, it is now mandatory in almost every situation to use laminated glass.

331 clear laminated glass

Our 331 clear laminated glass can be used for further processing to obtain tempered glass, laminated glass, toughened glass, etc. Apart from processing, they can be coated with a metal oxide to make tinted glass which is utilized in protection against solar glare.

Shenzhen Dragon Glas's large quantity capacity output can ensure our 331 clear laminated glass price is competitive in China glass market. Our strict quality control system can ensure clear laminated glass with the best quality.

Features:

- **Super high transmittance:** we adopt the top grade 3mm float glass with transmittance up to 89%;
- **Safety & Security:** When the clear laminated glass is attacked by an outside force, the PVB film has strong tenacity and can absorb and weaken a mass of striking energy, so it is very hard to penetrate. Even if it's broken, the broken glass sharp pieces will stick to the PVB film and not scatter, to ensure human safety effectively.
- **Splendid soundproofing function:** our high-quality glass sheets and top-grade PVB reduce stop the sound transmission. A standard insulated window with one layer of laminated glass would have a sound transmission class of around 32-35, highly improved from a standard insulated window without laminated glass.
- **No flaws:** flaws such as bubbles, chips, scratches, overlap, etc won't appear in our 331 laminated glass sheets because of our strict quality control system;
- **Multiple color options are available:** besides the clear PVB, can also choose tinted glass or color PVB to adopt to fulfill different kinds of designs.
- **Good to cut to size:** cutting laminated glass is always not as easy as cutting float glass, but our 331 laminated glass sheets are easy to cut to custom sizes without chips raising, making the rest process work or installation easy to go.

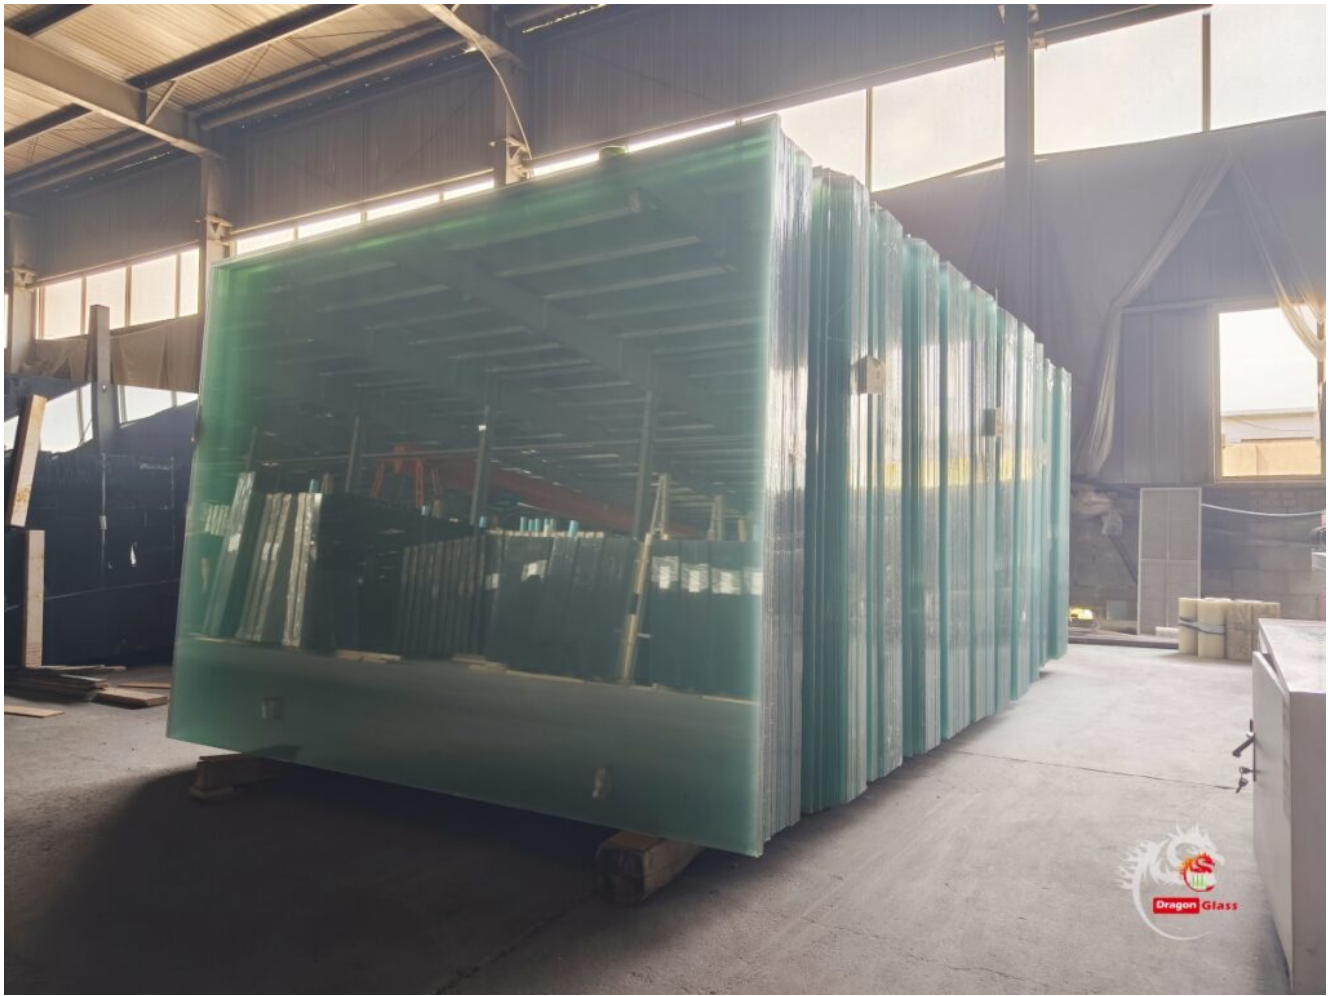

331 laminated glass production detail:

The laminated glass size we often produce are:

- 2140mm* 3300mm
- 2140mm*3660mm
- 2250mm*3300mm
- 2440mm*1830mm
- etc.

Specifications:

Production name: 331 clear laminated glass price; 6.38 clear laminated glass sheets;
Glass thickness: 3+3, others 4+4, 5+5, 6+6, bespoke specifications are all available ;
Glass colors: clear, others grey, green, blue, and bronze are all available;
PVB thickness: 0.38, others 0.76, 1.14, 1.52 are all available;
PVB colors: clear, white translucent , others grey, green, blue, and bronze are all available;
Functions: for soundproofing, safety, and decoration purpose;

Stock sizes: 2140*3660, 2140*3300, 2440*3660, 2440*3300, 2440*3050, 1220*1830, 2440*1830, 2440*1650, 2140*1650, 2140*1830, etc;
Process: washing & cleaning, lamination in the dust-free room;
Certifications: AS/CE/SGCC/CCC/ISO9001, etc;
Production time: 7~15 days after the order is confirmed;
Samples: free samples are available within 5 days.

Quality:

- Subject to CE;
- Subject to BS;
- Subject to SGCC;
- Subject to AS;
- Subject to ISO9001;

What is the best 311 clear laminated glass price?

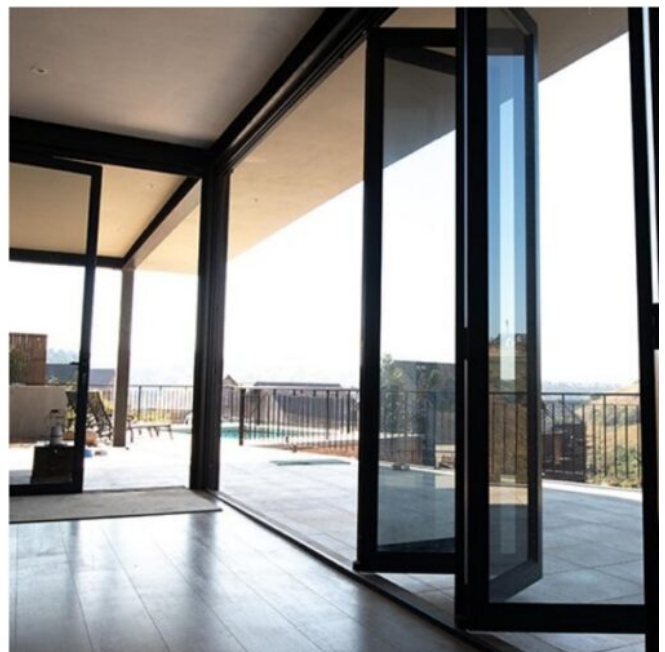

311 clear laminated glass price will depend on the below factors:

- **Glass colors:** tinted glass normally will be a higher price than clear glass;
- **Glass size:** if the enquire size is subject to our stock size, the 331 clear laminated glass price will be the most competitive, if sizes are different, cutting laminated glass to customize sizes means a higher price;
- **Quantity:** our MOQ for 6.38 or 8.38 or 10.38 or 12.38 clear laminated glass is 1*20GP container. If larger quantity, our production cost will be lower thus the price will be more competitive;
- **Raw material cost:** when the season changes, or market needs and supplies change, it might influence the clear laminated glass price too.

Applications:

311 clear laminated glass sheets are good for doors, windows, shower doors, dividers, partitions, tabletops, etc.

Packing and delivery:

the plastic paper between each piece of glass

strong wooden crate packing to ensure the safety of glass shipment
