

China reliable supplier colorless 2mm glass for sale

What is colorless 2mm glass?

Colorless 2mm glass also called 2mm [clear float glass](#), which is a kind of glass, derived from the manufacturing process where molten glass is poured from the furnace and floated evenly onto a bed of molten tin. The glass is gently cooled under controlled conditions to anneal the glass which enables the glass to be cut and modified.

[Shenzhen Dragon Glass Co., Ltd](#) 2mm clear glass is a high quality, visually colorless and distortion free flat surface,

providing high light transmission (daylight) and clarity. Clear Float glass is the core base product for most of our common glass products and is easily adjusted to a specific requirement: cutting, [laminating](#), etching and so on.

The stocks of 2mm clear glass in warehouse

All in standard in our warehouse, ready to send to clients

Characteristic of 2mm clear float glass

- **Transparency:** Clear glass has high visible light transmittance, reach almost 90%, allowing for excellent clarity and transparency. It is the most commonly used type of glass.
- **Color Neutrality:** Clear glass typically exhibits reasonable color neutrality, meaning it maintains the natural colors of objects seen through it.
- **Green Hue:** As the thickness of clear glass increases, a green hue may become more noticeable. However, in the case of 2mm clear glass, the green tint is very faint when viewed on edge.
- **UV Blocking:** Some types of 2mm clear glass, such as the UMS Decor Crystal Clear Glass mentioned in the search results, may have UV blocking properties. For example, blocking 45% of UV rays while still allowing 90% light transmission.
- **Smoothness:** Clear float glass, including 2mm clear glass, is known for its good smoothness, which enhances its visual appeal.
- **Optical Distortion:** Clear float glass typically exhibits no optical distortion, ensuring a clear and undistorted view.

Production line and warehouse from SDG

Specification of 2mm clear float glass

Our team work with brand express company all over the world, have a good cost.

How's the inspect the quality of the clear float 2mm glass

- 1-Check for a range of defects, including blisters, stones, spots, chips, scratches, bubbles, inclusions, and so on. These inspections are crucial for maintaining the desired glass grade and ensuring the absence of impurities.
- 2-To determine the quality of float glass, various methods can be used. The sink-float comparator method is commonly employed to evaluate the density of small pieces or specimens of glass.
- 3-The clarity of the glass is also an indicator of its quality, with visible impurities or color tints suggesting inferior material.
- Overall, the inspection of clear float 2mm glass involves a combination of automated inspection systems and manual evaluation techniques to ensure the highest quality standards are met.
