

**Clear Color 8mm+15A+8mm
Double Glazed Glass Supplier**

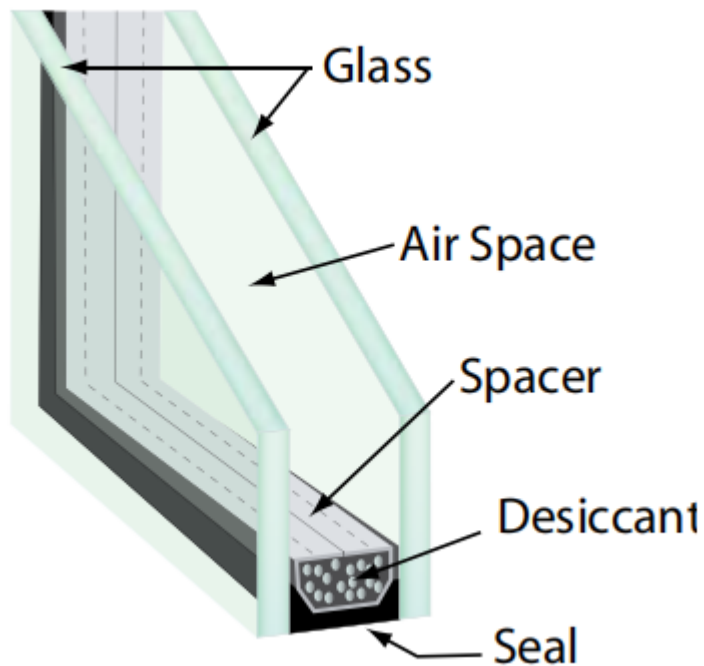

What is the Clear color 8+15+8 double glazed glass?

Clear Color 8+15+8 Double Glazed Glass consists of two panes of 8mm clear float tempered glass separated by a 15A aluminum spacer and sealed together at the edge. It belongs to the category of [insulated glass](#).

Tempered glass, also known as toughened glass, is a type of safety glass that is strengthened through controlled thermal \square over 600 \square or chemical treatments. Unlike regular annealed glass, toughened glass breaks into small granular chunks instead of sharp shards, reducing the risk of injury and making it safer for humans.

Double glazed refers to the structure of a glass unit that consists of two panes of glass or a glass panel with a laminated glass panel separated by a gap filled with an inert gas or vacuum. It ensures the performance of the glass in terms of heat insulation, sound insulation, etc., which makes it an excellent choice for construction.

What are the features of Clear Color 8m+15A+8m Double Glazed Glass?

- **Safety:** Even in the event of glass breakage, the multi-layer structure of insulated glass reduces the risk of injury from glass fragments and provides greater safety.

- **Environmental Friendly:** The thermal conductivity of insulated glass is much lower than that of single-pane glass, which saves energy and reduces carbon emissions.
- **Soundproofing:** The air layer of insulating glass absorbs noise, effectively reduces ambient noise, and improves the quietness of the indoor environment. It can reduce noise by more than 35 dB+.
- **UV Reduction:** The coating of insulated glass effectively filters out UV rays and protects indoor furniture and walls from damage caused by UV rays.
- **Aesthetic Effort:** Its surface is flat and fresh, with rich color and good light transmission, which can meet the needs of various architectural styles.

What are the specifications of Clear Color 8m+15A+8m Double Glazed Glass?

Product Name: Clear color 8+15A+8 double glazed glass

Thickness: 8+15A+8mm=31mm; Other thicknesses can be customized.

Maximum Size: 3300x6000mm

Spacer: 15A, other spacer can be customized.

Spacer Color: Sliver, Black, Grey.

Shape: Flat/Shaped/Curved

Capacity:2000SQM/DAY

Certification: CE & IGCC
