

# Pantallas de privacidad de vidrio arenado de alta calidad de 6 mm

¿Alguna vez has notado que algunas de las superficies de vidrio son ásperas? Este tipo de vidrio se llama [vidrio esmerilado](#) . Hay dos tipos, vidrio arenado y vidrio grabado. Normalmente, el vidrio es rugoso por un lado y liso por el otro. ¿Cómo se hace el vidrio? Vamos a averiguar.

## ¿Qué es el vidrio arenado?

El vidrio pulido con chorro de arena se produce rociando arena a altas velocidades sobre la superficie del vidrio. Esto le da al vidrio una superficie translúcida, que suele ser más rugosa que la que produce el grabado. La profundidad y el grado de translucidez del acabado del vidrio varían según la fuerza y el tipo de arena utilizada, luego se personalizan los patrones y diseños.

## Aplicaciones

## Seis razones por las que elige barandillas de vidrio de privacidad

- 1. Atractivo:** las barandillas de vidrio son atractivas y se ven mejor que las barandillas de madera. Aumenta el atractivo visual.
- 2. Resistencia:** el templado hace que el vidrio sea cinco veces más resistente que el vidrio ordinario. No te preocupes por la rotura del cristal.
- 3. Seguridad:** aunque el cristal se rompa, no es probable que te lastimes porque es un cristal de seguridad.

**4. Durabilidad:** el vidrio tiene una vida útil mucho más larga que las barandillas de madera para terrazas. Puede resistir el viento, el agua, los arañazos. Se mantiene en buen estado años después.

**5. Fácil mantenimiento:** ¿Se ha cansado del mantenimiento de las barandillas de madera? La superficie de vidrio es fácil de limpiar con agua y un poco de limpiador.

**6. Privacidad:** el vidrio esmerilado brinda más privacidad que separa su hogar de los vecinos.
