

Top 10 fabricante de vidrio templado en China con buen precio

¿Qué es el vidrio templado?

Buen fabricante de vidrio templado puede asegurarse de que su vidrio de alta calidad con una larga vida útil.

El vidrio templado también se llama vidrio templado (en algunos países también llamado vidrio manipulado). En comparación con el vidrio recocido o flotante normal, el vidrio templado tiene más de 5 veces más resistencia. Vidrio

templado se considera como una parte superior Un vidrio seguro no sólo porque tiene mayor resistencia, sino también cuando se rompe, se romperá en trozos muy pequeños con ángulos obtusos que no harán daño a los seres humanos.

If you need to enhance the safety of the tempered glass, you can further process it as [laminated safety glass](#).

How tempered glass manufacturers make tempered glass?

To produce tempered glass, first of all, you have to cut the glass to your final size, then polished the edges with grinding machines, clean the glass surfaces by washing machines and then transfer into tempering machines, with heat to around 700-degree temperature and keep for due time. Using the strong wind jet to cool the glass rapidly. Thus causing the glass surface into compression whereas the interior side is still in tension. This thermal treatment will increase the glass strength to above 95 Mpa.

How to qualify a good tempered glass manufacturer?

To distinguish the quality of tempered glass is the most important part no matter your product is only tempered glass or tempered laminated glass or tempered insulated glass. This will influence your solution for windows & doors or railing or facade job.

To make sure the quality of tempered glass, several items:

1. High-quality raw material float glass is recommended;
2. Cutting & Grinding machines have to be accurate sizes;
3. Tempered machines should be good. As it will mainly influence the quality of tempered glass.
4. Experienced operators or engineers can guarantee glass quality better.
5. Do experiments regularly to make sure tempered glass quality stable.

[Shenzhen Dragon Glass](#) tempered glass features:

Item	Tempered glass / Toughened glass /Tampered glass
Color	Clear, ultra-clear, light grey, dark grey, green, blue, pink, etc
Thickness	4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 15mm, 19mm, 22mm, 25mm, etc
Glass type	Clear tempered glass, tinted tempered glass, coated tempered glass, half tempered glass, online Low-E tempered glass, solar reflective coating tempered glass, ceramic frit tempered glass, digital printing tempered glass, heat soak test tempered glass, curved tempered glass, etc.
Applications	Facade, curtain wall, canopy, windows, doors, railings, skylight, shower doors, balustrade, staircases, glass floors, partition walls, office doors, etc
Max size	3300*13000mm
Capacity	5000SQM/day
Quality standard	Subject to CE & ASTM & CCC & ISO9001

What are the applications of tempered glass?

Tempered glass is widely used in the construction area due to its high strength and safety, most of all, it will cause a sense of space for

human beings, tempered glass prices relatively low compared to composite products, thus making it the most favorable material designed by architect or designers.

Tempered glass can be used as windows & doors, railing, canopy, skylight, sunroom, facade, curtain wall, staircases, storefront, etc.

Contact us if you would like us to provide the best solution for you.

Why choose [Shenzhen Dragon Glass](#) tempered glass?

1. We are one of the top 10 tempered glass manufacturers in China, have full experience producing and delivering.
