

Cristal de grabado de diamante superbrillante de 10 + 15 mm

¿Qué es el cristal de grabado de diamantes?

Vidrio de grabado de diamante, también conocido como vidrio tridimensional de cristal, el vidrio de grabado de diamante es para tallar y pulir vidrio flotado ultrablanco a través de la forma establecida por herramientas de grabado y equipos electrónicos para que la superficie del vidrio produzca el efecto tridimensional y claridad cristalina de los diamantes, que constituye un estilo moderno simple y brillante. Es ampliamente utilizado para la decoración de puertas, ventanas y paredes.

¿Cómo fabricar vidrio tallado con diamantes?

Todo el proceso se realiza mediante una máquina de grabado de vidrio. Primero, diseñe la forma que necesita tallar en CAD. Esta vez esculpimos la forma del diamante. Más tarde, transforma los patrones en máquinas de grabado de vidrio CNC. Grabará de acuerdo con la forma de diamante diseñada.

¿Se puede endurecer y laminar el vidrio tallado con diamantes?

El tipo de vidrio se puede endurecer, pero su estado de superficie cambia debido al proceso de grabado del vidrio. La tasa de microgrietas en la superficie del vidrio puede aumentar cuando se temple. Por lo tanto, se recomienda utilizar vidrio laminado ranurado en lugar de vidrio ranurado templado para mejorar su seguridad.
