

Vidrio formado en horno súper elegante con buen efecto decorativo

¿Qué es el vidrio formado por el horno?

El vidrio formado en horno, también conocido como vidrio tridimensional de cristal, el vidrio formado en horno supera la forma de vidrio existente, da pleno juego a la concepción artística de diseñadores y procesadores e integra formas de arte modernas o clásicas en el vidrio para que el vidrio plano pueda procesarse con varios efectos artísticos desiguales y coloridos. Hay muchos tipos en la actualidad, se pueden usar en vidrio incrustado en paredes a gran escala, vidrio de partición, lavabos de vidrio de baño integrados, marcos de espejos terminados, adornos de arte de vidrio, etc. El ámbito de aplicación es muy amplio debido a su material de vidrio único y su efecto artístico.

¿Cómo fabricar vidrio formando horno?

El vidrio formado en horno está hecho de un horno de horno especial, vidrio plano y materiales de color inorgánicos como las principales materias primas. Se establece un programa de calentamiento específico y una curva de recocido. Por encima del punto de reblandimiento del vidrio calentado, se forma y se recoce un molde de formación especial, si es necesario, luego se procesa después del grabado, taladrado, templado,

laminado, etc.
