2, ¿Qué es el vidrio templado laminado?

Laminated tempered glass is to combine two or more pieces of [tempered glass](#) together with pvb or sgp or eva interlayers. The tempered glass can be clear or ultra-clear or tinted colors to achieve various of color design. Single tempered glass strength is 5 times stronger than normal annealed glass, whereas laminated tempered glass can join two or more pieces of tempered glass together, therefore, making the glass super strong and tough. Even when one tempered glass panel is broken

by extreme impact, the broken pieces of glass can still glue together with the interlayer material.

Cuando el vidrio templado laminado se rompe, todavía ofrecerá una cierta fuerza para soportar el impacto.
