

Attractive Fluted Glass

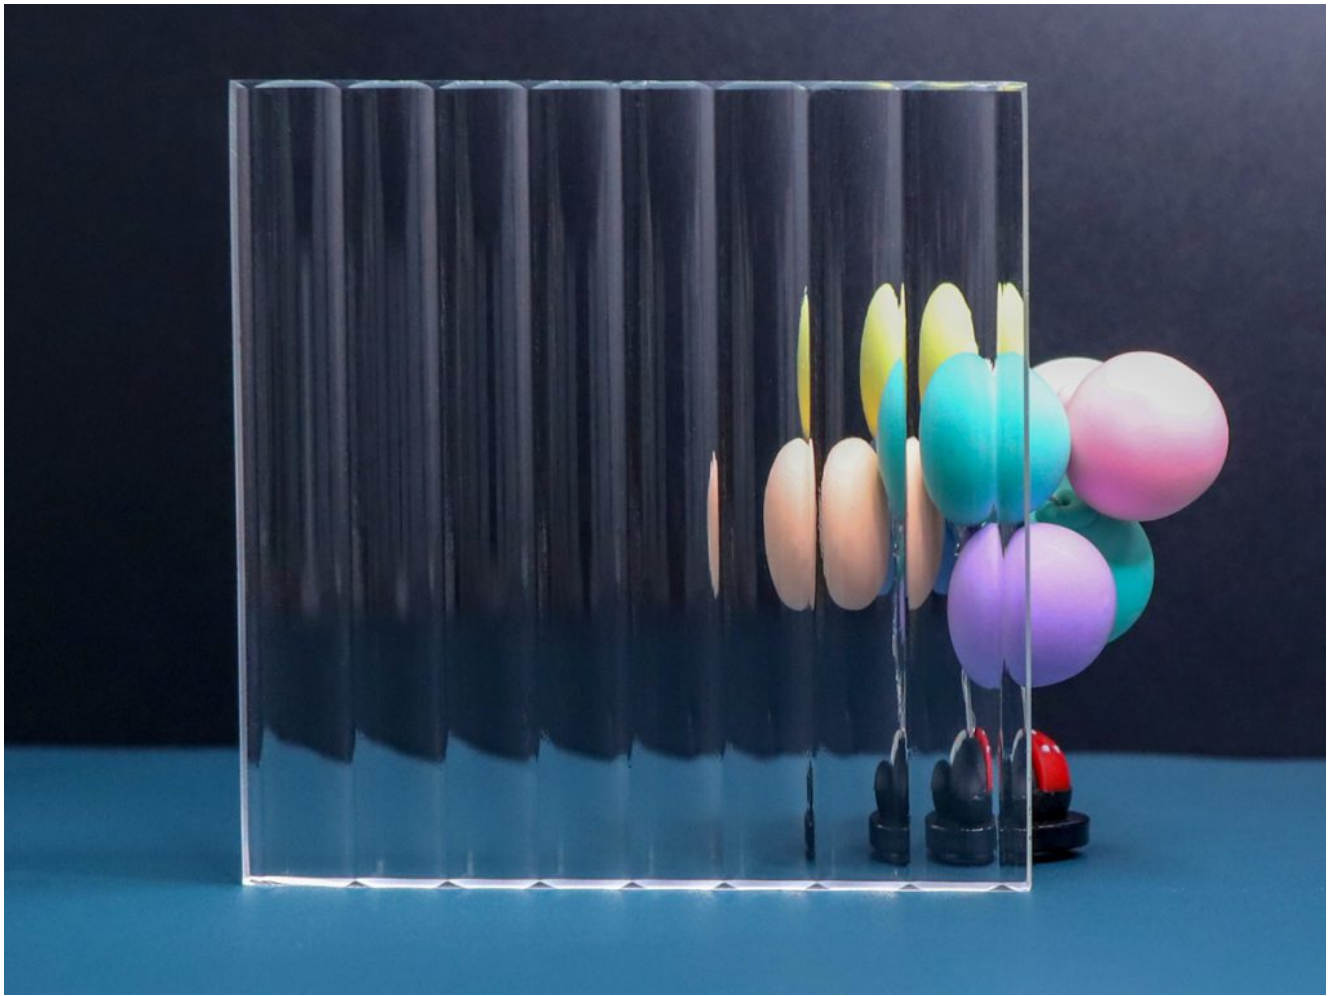

Customized Decorative Glass

Fluted glass is known for its beautiful and unique vertical grooves. It is also called [ribbed glass](#) or textured glass.

Fluted glass is pretty popular among architects and interior designers who want to add texture to a room while allowing light to pass through and providing privacy.

Texture glass can be made into safety glass, laminated glass, and tempered glass, so you won't get injured when the glass breaks, which makes it suitable for both interior and exterior.

Texture glass can diffuse light

How Is Fluted Glass Made?

The glass is made by pressing semi-molten glass between metal rollers to create unique textures and patterns. It can be also made by carving the glass surface to create the same design, which provides more design options.

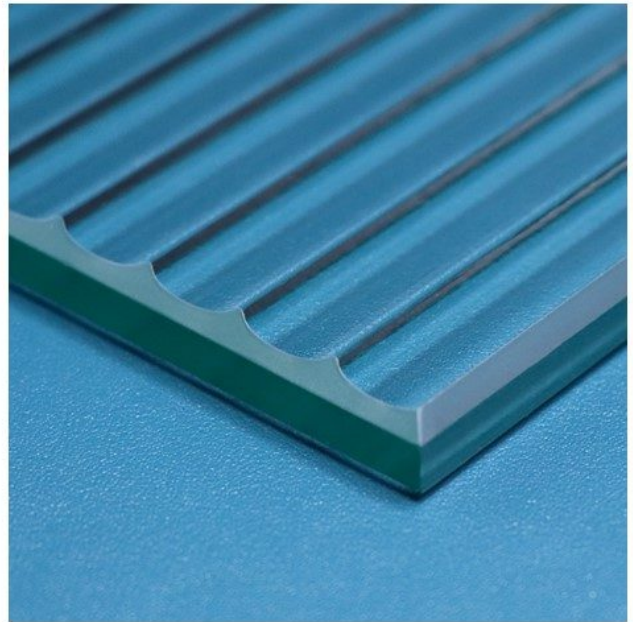

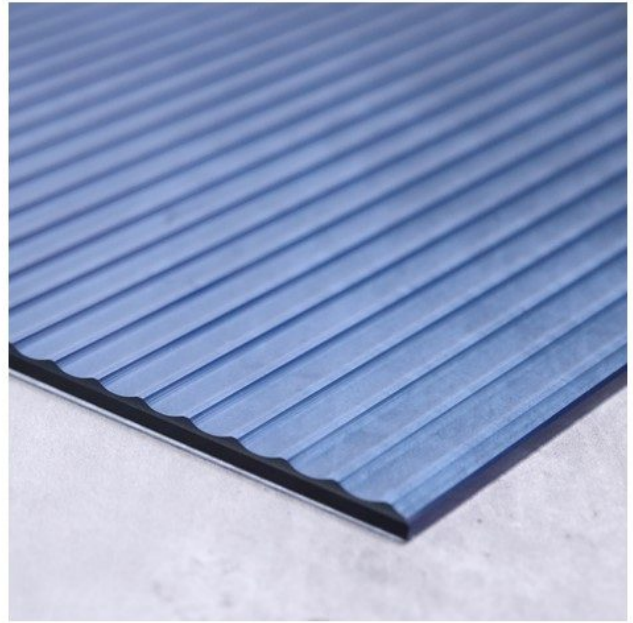

[Shenzhen Dragon Glass](#) has experienced technicians and advanced equipment, providing specialized finishing services, including edging and polishing, and cutting and shaping to achieve any decorative look you desire to meet your design needs.

Where Do You Need Fluted Glass?

Ribbed glass is suitable for glass walls, windows, and doors. Its vertical texture appearance solves the problem of creating privacy and still maintains brightness for interior spaces.

It is mostly used for internal rooms where privacy is needed, perfect for bathrooms, office rooms, privacy windows, etc.

Applications
