

Verre de gravure diamant super étincelant 10+15 mm

Qu'est-ce que le verre de gravure au diamant?

Verre de gravure au diamant, également connu sous le nom de verre tridimensionnel en cristal, le verre de gravure au diamant consiste à sculpter et à polir le verre flotté ultra-blanc à travers la forme définie par les outils de gravure et l'équipement électronique de sorte que la surface du verre produise l'effet tridimensionnel et l'impidité cristalline des diamants, ce qui constitue un style moderne simple et lumineux. Il est largement utilisé pour la décoration des portes, des fenêtres et des murs.

Comment fabriquer du verre taillé au diamant ?

L'ensemble du processus est réalisé par une machine de gravure sur verre. Tout d'abord, concevez la forme qui doit être sculptée en CAO. Cette fois, nous avons sculpté la forme du diamant. Plus tard, transformez les motifs en machines de gravure sur verre CNC. Il gravera selon la forme de diamant conçue.

Le verre taillé au diamant peut-il être trempé et feuilleté ?

Le type de verre peut être trempé, mais son état de surface est modifié en raison du processus de gravure du verre. Le taux de microfissures à la surface du verre peut augmenter lors de la trempe. Par conséquent, il est recommandé d'utiliser du verre rainuré feuilleté au lieu du verre rainuré trempé pour améliorer sa sécurité.
