

# High quality of frameless glass railing system

## Performance description of frameless glass railing system:

1. The surface strength is high and you are not afraid of bumping: the glass of the fence has been strengthened. For the bumps on the glass guardrail during use, and accidental collision of the guardrail, will not affect the performance and appearance, so when using it No special attention is required.

2. Clean and beautiful: The surface of the glass fence will not accumulate dust for a long time, and will not affect the color and transparency of the fence. As long as you choose water and a rag to wipe the fence, it will not have any effect on the surface.

The frameless glass railing system is based on specially processed tempered glass as the basic element and added with

one or more kinds of metals or other semi-transparent or fully transparent railings (without frame and column, fully transparent) composed of one or more metals or other wood frames. It is not like an iron fence, which is easy to oxidize and rust outdoors, nor is it a single type like stainless steel fence. The advantage of glass is that its anti-corrosion is significantly better than ordinary steel, it is not easy to be oxidized and rusted, and its price is reasonable. Its unique transparency has been favored by the majority of builders, designers, and consumers.

The glass fence does not need painting and maintenance, and it is new and not old, which saves you from the fatigue and trouble of maintenance. Combined with the long service life, the overall cost is low.

## **Safety of frameless glass railing system**

Frameless glass railings are designed with a comprehensive consideration of safety and beauty. As long as the quality of the frameless glass railing accessories passes, the normal installation will be quite stable. Frameless glass railings are made of tempered glass, so there is no need to worry about hurting anyone if the glass is broken. For children, other

wooden railings and iron railings may have some sharp corners that are easy to scratch or get stuck, but the frameless glass railing is a continuous plane after installation, which can effectively prevent children from getting stuck or scratched

## **How to install a frameless glass railing system?**

### **1. Spread the board on the cement floor:**

### **2. Place u-shaped grooves and confirm the distance between them:**

### **3. Install the u-shaped groove and put in the special tape:**

**4. Place the glass plate and insert it into glue to fix it:**
