

Are you still struggling with choosing the glass greenhouse or plastic greenhouse?

The glass greenhouse has always been the most popular option for greenhouse owners, and that popularity shows no sign of weakening. They offer several advantages over traditional non-transparent greenhouses, such as better light transmission, improved insulation, and the ability to be used all year round.

What is the Glass Greenhouse?

The glass greenhouse is also called glass conservatories. It's made of glass which has been hot in recent years, are more popular and common than other greenhouse alternatives. Panes in glass for the greenhouses are made of modern durable glass materials, usually with aluminum or steel frames fastened together around them.

Glass Greenhouse

What kind of glass should the greenhouse choose?

Many people will ask whether the glass for greenhouses must be toughened or not. In fact, it is not complete, you can also choose non-toughened laminated glass for your greenhouse.

Laminated glass is two or more lines (pieces) of glass permanently bonded together with one or more plastic interlayers (PVB) using heat and pressure. When it has broken the fragments will tend to adhere to the plastic layer and remain largely intact, reducing the risk of injury.

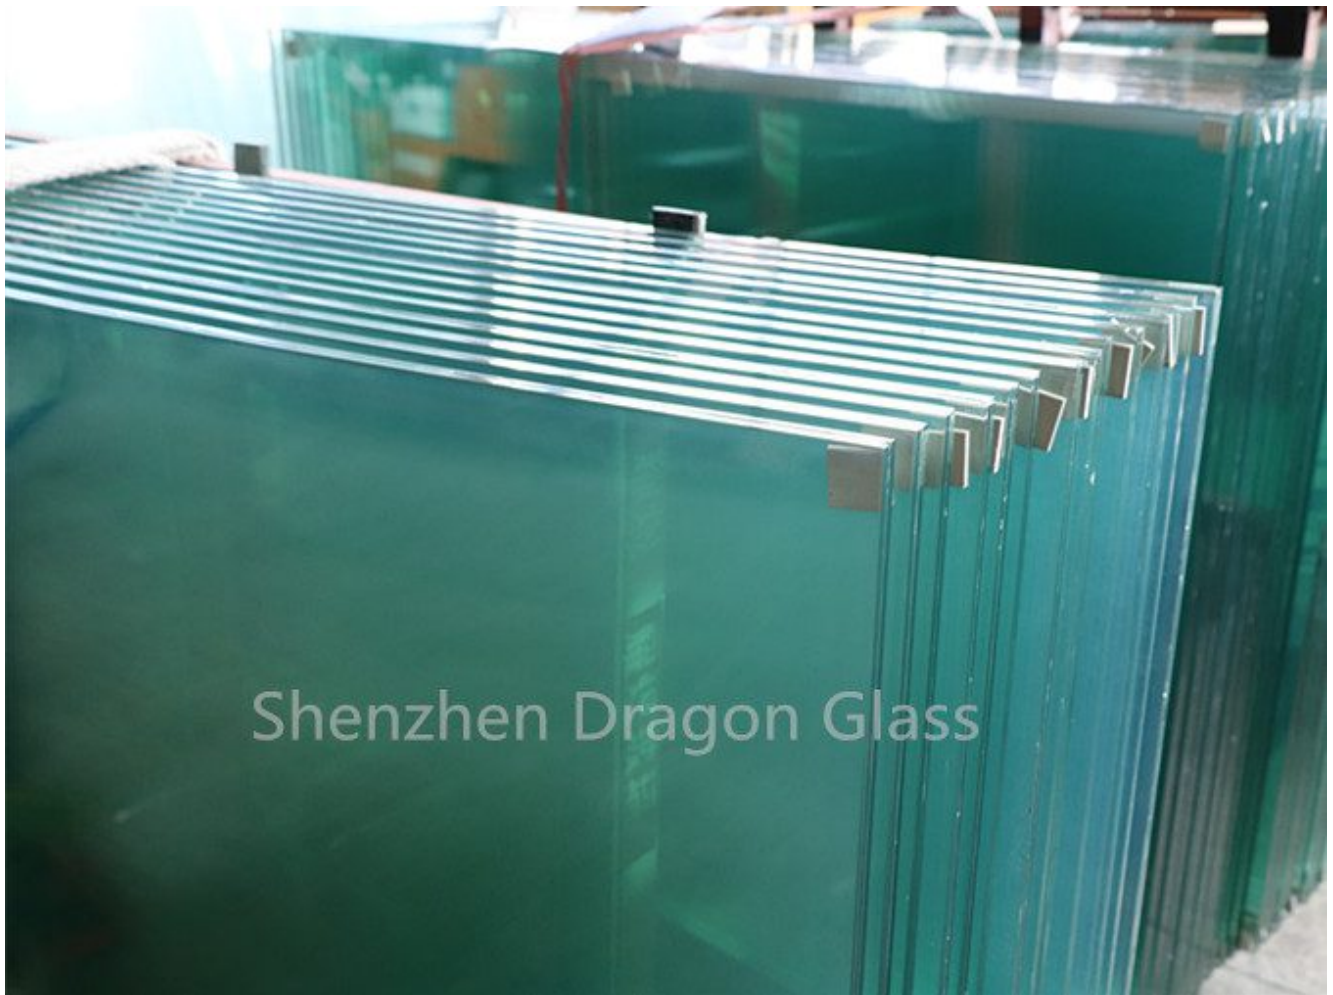

Glass Greenhouse

The advantages of the laminated glass greenhouse

- **Safety:** When it shatters, the pieces do not fall easily, reducing the risk of injury
- **Better look:** You can see through the glass clearly. And it also increases the aesthetics of the greenhouse
- **Easy to clean:** You can easily remove stains from glass
- **Flame-resistant:** So it's completely okay to use it in garden areas where barbecues take place.

- **Easy to replace:** You only need to replace the broken glass, not the entire glasshouse
- **Environmental production:** Reduce the use of plastic, glass materials are more environmentally
