

6+6 glass wall panels made of extra clear safety glass sheets

What is the milky white glass wall panel?

Here we are going to introduce two methods to manufacture milky white glass wall panels, one is the ceramic fritted process; the other is the laminated glass process.

Milky white ceramic fritted glass is made by applying screen-printing technology to apply white ceramic ink to the glass surface, and then the glass&ink will undergo high-temperature tempering to form a permanent coating. It has good advantages of multiple decorations, anti-scratches, anti-acid, etc. The ink on the glass surface after the high-temperature tempering process has the same long lifespan as the tempered glass.

Milky white laminated glass is using two or more pieces of glass permanently bonded together with one or more milky white color PVB by high temperature and high pressure. The glass panels can be tempered or non-tempered.

The glass wall elevates the style of the house

Want to add a splash of color into your boring monotonous interior? Adding a milky white glass wall will be a good choice! Whether it is living room walls, bedroom wardrobe panels, or kitchen backsplash, the milky white glass wall takes any space to a whole new level.

Wall panels made of milky white glass will bring a luxurious

dash to your walls. It will also save you a lot of money and effort in the long run. The vibrant shades of the glass wall and the light effects it brings about will uplift the style of your inner walls. The hue and the light together will bring the other elements of design to life as well. Their durability makes glass wall suitable for all locations- be it the kitchen or bathroom or partition.

The interior glass wall is more than just its good looks and flawless finish. They are extremely resistant to scratches and colors will not fade away. Along with this, as it is a smooth solid surface, unlike other particles or finishes, it ensures your kitchen is clean and hygienic all the time.
