

Superb soundproofing laminated windows 5+5mm 6+6mm 8+8mm

Have you ever been annoyed by the noise of traffic or the noisy children playing games or the voice of humans talking loud, etc? Making you feel like something getting into your mind and you just want it to get away and get quiet?

How to reduce noise by choosing the right glass for windows?

Here we have solutions for you! Superb soundproofing ***laminated windows***! With these soundproofing laminated glass windows, you can enjoy a quiet sleep or an attentive reading.

1, What is laminated glass window?

Laminated glass windows generally are made of two or more pieces of glass panels sandwiched together by a PVB or SGP interlayer. This kind of configuration can help you prevent sound transfer. Laminated glass windows for noise reductions can reach 30dB+. You can design your laminated glass windows as double laminated, triple laminated, or even multiple laminating windows, several tinted colors of glass can be your options, or you can choose the [color PVB](#) to be your unique design.

Multiple choices for laminating windows design

2, What is the benefit when you are using laminated glass windows?

1, **High strength & safe**, not easy to break into when there are any thefts trying to break in. You can even enhance the anti-theft function with a metal net laminated inside to connect with the police line. So that when there is any intent to break through the laminated windows, it will trigger the alarm.

2, **Super high glass transmittance** ensuring you see through clearly the outside scenery. You can enjoy the sunshine and the beautiful beach.

The modern luxury bedroom opens to the patio with an ocean view

3, **Super soundproofing function** to make sure you have good sleep at night and a noiseless environment when you are reading.

Sleeping like a baby in a quiet environment provided by laminating windows.

3, With so many benefits of laminating windows, you may wonder how to produce it?

Shenzhen Dragon Glass adopts  for raw material. After cutting the glass to your windows sizes. Do the edge works, and transfer to the tempering lines. Heating the glass to over 620-degree temperature and then cooling down rapidly with a strong wind jet, thus increasing the glass strength high up to five times more.

After the [glass tempering](#) process, the glass will be paired and put into laminating lines. In a clean and dry lamination room, we will put the PVB or SGP interlayer between the glass panels. Strictly controlling the glass processing with a quality control system. Make sure that no bubbles and no overstep occur. Below is how we process the laminating windows.

4, Shenzhen Dragon Glass laminated windows properties:

Production Name	Laminated glass windows
Glass thickness	3+3mm, 4+4mm, 5+5mm, 6+6mm, 8+8mm, 10+10mm, etc; 5+5+5mm, 6+6+6mm, 8+8+8mm, etc Other thickness is customizable.
Glass color	clear, ultra clear, blue, green, bronze, grey, etc.
Glass interlayers	PVB / SGP / EVA
Shape	Flat/curved
Function	Soundproofing, safety, good decoration, high strength, etc
