

# 6+6 glassveggpaneler laget av ekstra klare sikkerhetsglassplater

## Hva er det melkehvite glassveggpanelet?

Her skal vi introdusere to metoder for å produsere melkehvite glassveggpaneler, en er den keramiske fritted prosessen; den andre er den laminerte glassprosessen.

**Melkehvitt keramisk fritted glass** er laget ved å bruke silketrykkteknologi for å påføre hvit keramisk blekk på glassoverflaten, og deretter vil glasset gjennomgå høytemperatur herding for å danne et permanent belegg. Den har gode fordeler med flere dekorasjoner, anti-riper, anti-syre, etc. Blekket på glassoverflaten etter høytemperaturherdingsprosessen har samme lange levetid som det herdede glasset.

**Melkehvitt laminert glass** bruker to eller flere glassbiter permanent bundet sammen med en eller flere melkehvite farger PVB ved høy temperatur og høyt trykk. Glasspanelene kan herdes eller ikke herdes.

## **Glassveggen løfter stilen på huset**

Vil du legge til en skvett farge i ditt kjedelige monotone interiør? Å legge til en melkehvit glassvegg vil være et godt valg! Enten det er stuevegger, soverom garderebepaneller eller kjøkken backsplash, tar den melkehvite glassveggen plass til et helt nytt nivå.

Veggpaneler laget av melkehvitt glass vil gi en luksuriøs dash til veggene dine. Det vil også spare deg for mye penger og krefter i det lange løp. De livlige nyansene på glassveggen og

lyseffektene den gir, vil løfte stilen på de indre veggene dine. Nyansen og lyset sammen vil også bringe de andre elementene i design til liv. Deres holdbarhet gjør glassveggen egnet for alle steder – det være seg kjøkkenet eller badet eller skilleveggen.

Den indre glassveggen er mer enn bare det gode utseendet og feilfri finish. De er ekstremt motstandsdyktige mot riper, og farger vil ikke falme bort. Sammen med dette, da det er en jevn solid overflate, i motsetning til andre partikler eller overflater, sikrer det at kjøkkenet ditt er rent og hygienisk hele tiden.
