

Utmerket 6mm + 1,52pvb + 6mm klart laminert herdet glass balkong rekkverk leverandør, konkurransedyktig 13.52mm herdet laminert glass balkong rekkverk kostnader.

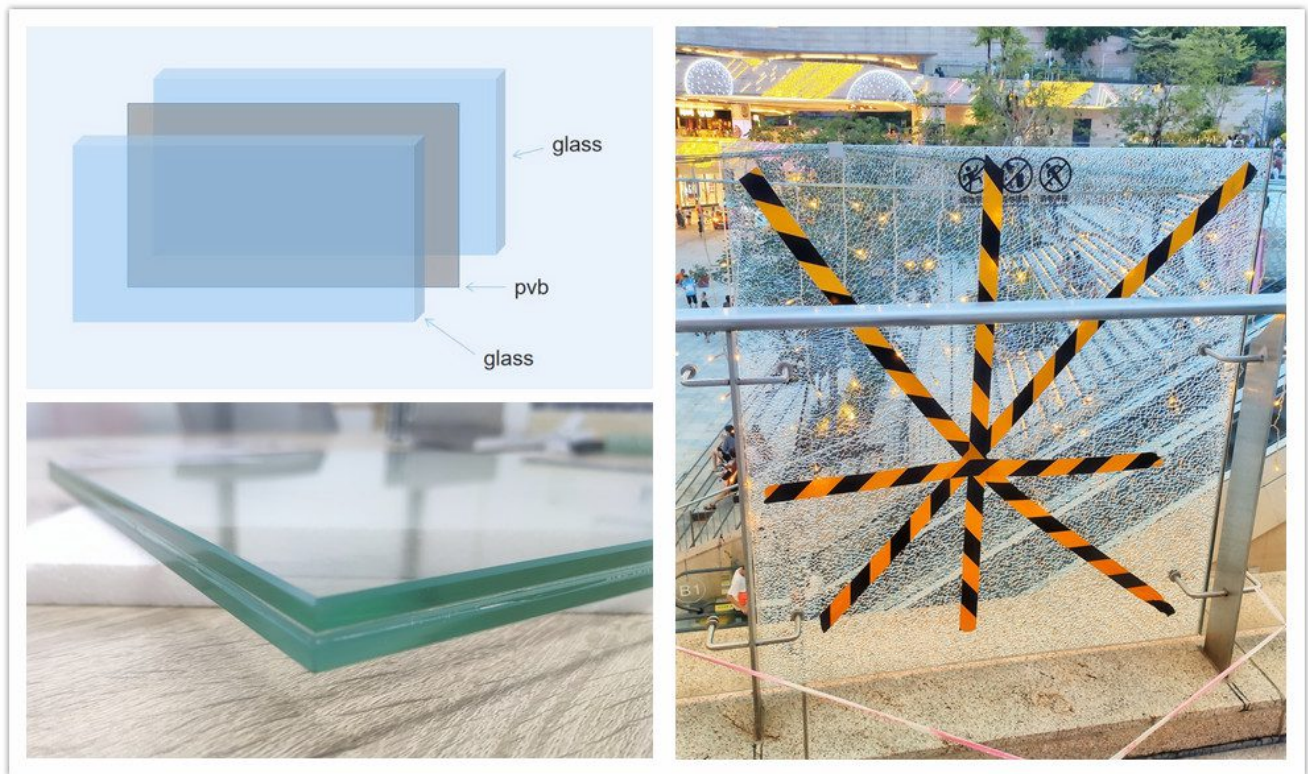

1, Hva er 13.52mm laminert herdet glass balkong rekkverk?

13.52mm klart laminert herdet glass balkong rekkverk består av to 6mm klart herdet glass paneler sammen med 1,52 mm PVB mellomlag. Vanligvis vil bli beskrevet som 6mm klart herdet + 1,52PVB + 6mm klart herdet laminert glass balkong rekkverk.

This type of laminated tempered glass balcony railing design can offer super high strength and can endure a strong impact without breaking. Even one piece of tempered glass breaks, the

other tempered glass panel can hold the balcony railing in one whole, bidding you time for a replacement.

Of course, if you need further insurance of security, [SGP laminated glass](#) will be recommended.

Tempered laminated glass, when one piece breaks, the other panel and the PVB will glue the glass together bidding time for a replacement.

2, Hvordan sikre 13.52mm laminert herdet glass balkong rekkverk kvalitet?

Many clients always ask, why the laminated tempered glass balcony railing cost from your company is different from others? Actually, there are so many factors that will influence the glass balcony railing cost, here we listed some of them:

1, Glass raw material needs to be good. There are several grades of float glass from different brands. It could be roughly divided into Top A grade, grade B, grade C & grade D. The difference between different grade glass can be viewed in detail as below: 1)Grade A: no bubbles, no chips, no scratches with super smooth surface; 2) Grade B: a little bubbles or stones, but within the acceptable level which is invisible if not carefully inspected; 3) Grade C: visible flaws but acceptable for those with no high requirement for glass quality.

Vi vedtar klasse A.

2, Bruk høy kvalitet PVB. det er så mange merker av PVB i Kina. Noen er god kvalitet med høy overføring. Noen er lave som vil resultere i delaminering etter ett år eller mindre. Vi vedtar Kingboard PVB eller samme nivå PVB merker som kan sikre ingen delaminering for en lang levetid.

3, Super presis glassskjæring som sørger for at det er oversteg for laminert glass.

4, Super høyt trykk og høy temperatur for å sikre at det ikke er bobler, ingen forurensninger eller noen flekker av smuss inne i det laminerte glasset.

dust-free lamination production and high temperature autoclave

5, Komplett og streng kvalitet system sørge for at vår laminert glasskvalitet alle underlagt CE og ASTM høyeste standard.

2.General Principles for Glass Quality Control:

玻璃控制标准总则:

Glass Quality Control Standard:

玻璃控制标准:

- A. Plate glass shall meet ASTM C1036 standard;
平板浮法玻璃应符合ASTM C1036;
- B. Heat treatment plate glass shall meet ASTM C1048 standard;
热处理平板玻璃符合ASTM C1048;
- C. Tempered, heat strengthened glass shall meet ASTM C1048 standard;
钢化、半钢化玻璃符合ASTM C1048;
- D. Laminating glass shall meet ASTM C1172 standard;
夹胶玻璃应符合ASTM C1172;
- E. Insulating glass of unit shall meet ASTM E2190 standard;
中空玻璃符合ASTM E2190;

NO 序号	Process 工序名称	Quality Control Term 质量控制术语	Inspection Facility and Tool 检测设备/工具	Inspection Frequency 测试频率	Executive Standard 执行标准	Criteria (Qualified/Failed) 基准、规范(合格/不合格)
1	Raw Glass 原片	Appearance 外观质量	Visual check 目测	Every package (16pcs, 150 m ²) 每包(16片, 150 m ²)	Refer to ASTM C 1036-06 and client's standard 参照 ASTM C 1036-06 和客户标准	No defects shall be found by visual check Color for raw glass should match sealed sample Thickness of raw glass conforms ASTM C 1036-06 standard 片底不可见缺陷 原片玻璃颜色与封样片颜色相同 原片厚度符合 ASTM C 1036-06 要求
		Raw glass type 原片类型	Visual check/ and ruler 目测/钢直尺	Every package (16pcs, 150 m ²) 每包(16片, 150 m ²)	Raw Glass Management Rule (原片管理规定)	Thickness, grade and color should match the label 厚度、等级和颜色是否和标记卡一致

*** Farget pvb laminert herdet glass rekkverk:**

4, Balkong rekkverk produktegenskaper:

Produktnavn	6mm +1.52pvb+6mm klart laminert herdet glass balkong rekkverk system
Glass tykkelse	6 +6mm, andre tykkelser som 4 + 4mm, 5 + 5mm, 8 + 8mm, 10 + 10mm, etc.
Glass farger	klart, annet farget glass som bronse, blå, grå, grønn, grå, etc er også tilgjengelig.
Glass form	Flat/buet
Mellomlag	PVB, andre typer som SGP, EVA, etc.
Tykkelse for mellomlag	PVB: 0,38, 0,76, 1,14, 1,52, 1,90, 2,28, 3,04, etc; SGP: 0,89, 1,52, 1,90, 2,28, etc; EVA: 0,25, 0,50, 1,00, 0,38, 0,76, 1,14, etc.

Glass design	Frostet glass, digitalt trykt glass, keramisk fritglass, melkehvitt laminert glass, Gradientglass, mønstret glass, riflet glass, smeltet glass, nettinglaminert glass, farget laminert glass. Etc.
Tilbehør	Rustfritt stål 304 eller 316, aluminiumsramme, etc.
Kvalitet	underlagt CE & ASTM.
Pakking	sterke kryssfinerkasser.
Moq	50SQM.
Kapasitet	2000SQM/dag
