

Suveren lydisolering

Laminerte vinduer 5+5mm 6+6mm 8+8mm

Har du noen gang blitt irritert av lyden av trafikk eller støyende barn som leker spill eller stemmen til mennesker som snakker høyt, etc? Får du til å føle deg som noe å komme inn i tankene dine, og du vil bare at det skal komme unna og bli stille?

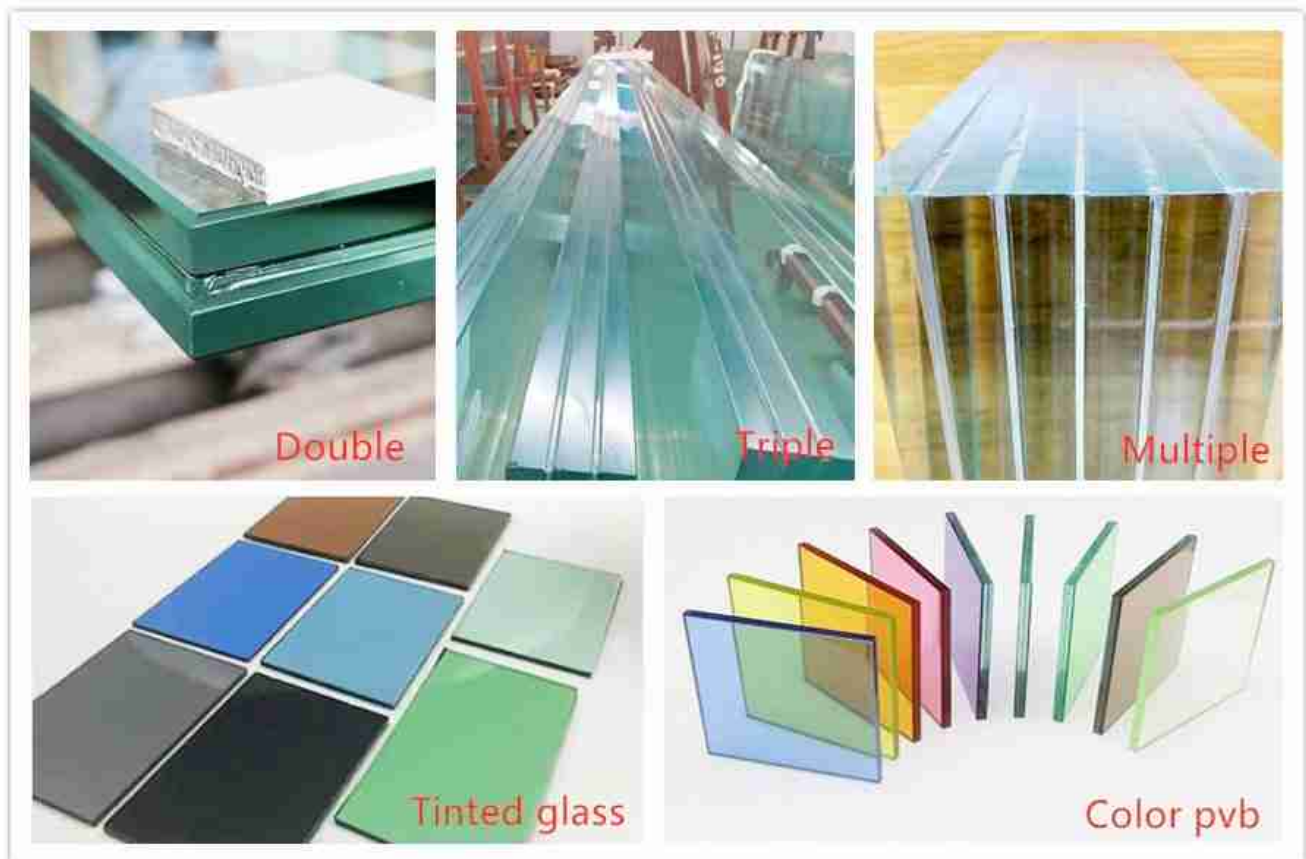

Hvordan redusere noise ved å velge riktig glass for vinduer?

Here we have solutions for you! Superb soundproofing ***laminated windows!*** With these soundproofing laminated glass windows, you can enjoy a quiet sleep or an attentive reading.

1, Hva er laminert glassvindu?

Laminated glass windows generally are made of two or more pieces of glass panels sandwiched together by a PVB or SGP interlayer. This kind of configuration can help you prevent sound transfer. Laminated glass windows for noise reductions can reach 30dB+. You can design your laminated glass windows as double laminated, triple laminated, or even multiple laminating windows, several tinted colors of glass can be your options, or you can choose the [color PVB](#) to be your unique design.

Flere valg for laminering av vinduer design

2, Hva er fordelene når du bruker laminerte glassvinduer?

1, **High strength & safe**, not easy to break into when there are any thefts trying to break in. You can even enhance the anti-theft function with a metal net laminated inside to connect with the police line. So that when there is any intent to break through the laminated windows, it will trigger the alarm.

2, **Super high glass transmittance** ensuring you see through clearly the outside scenery. You can enjoy the sunshine and the beautiful beach.

The modern luxury bedroom opens to the patio with an ocean view

3, **Super soundproofing function** to make sure you have good sleep at night and a noiseless environment when you are reading.

Stille lese bøker inne i lydisolerte laminert glass vindu

3, Med så mange fordeler med lamineringsvinduer, lurere du kanskje på hvordan du skal produsere det?

Shenzhen Dragon Glass adopts XXXXXXXXXX for raw material. After cutting the glass to your windows sizes. Do the edge works, and transfer to the tempering lines. Heating the glass to over 620-degree temperature and then cooling down rapidly with a strong wind jet, thus increasing the glass strength high up to five times more.

After the [glass tempering](#) process, the glass will be paired and put into laminating lines. In a clean and dry lamination room, we will put the PVB or SGP interlayer between the glass panels. Strictly controlling the glass processing with a quality control system. Make sure that no bubbles and no overstep occur. Below is how we process the laminating windows.
