

Panoramic Glass Sauna 6mm Lowe+12A+6mm Insulated Glass Manufacturer IGU Supplier

What is a panoramic glass sauna?

A panoramic glass sauna is a type of sauna that features large windows or walls made of glass, allowing users to enjoy expansive views of the surrounding landscape while relaxing inside the sauna. The glass panels provide an unobstructed view of the outdoors, creating a sense of openness and connection with nature during the sauna experience.

What is 6mm Low-e+12A+6mm Insulated Glass?

To understand the panoramic glass sauna, we should know what kind of glass is used. We recommend using 6mm Low-e+12A+6mm Insulated Glass as the main building material.

6mm Low-e+12A+6mm Insulated Glass refers to a type of insulated glass unit (IGU) commonly used in construction and building applications.

This is a three-layer structure insulating glass. It consists of a layer of 12A aluminum alloy spacers sandwiched between two 6 mm thick glass panels.

What are the characteristics of Low e insulating glass?

Thermal Performance

Thermal Performance: Low-E coating significantly reduces heat transfer through glass. They reflect heat back to the source, keeping the interior warm in winter and cool in summer. This helps increase energy efficiency and lower heating costs for buildings. It can effectively keep the temperature inside the sauna room from being absorbed by the outside.

UV Protection

Low-E coatings also provide protection from the sun's ultraviolet (UV) rays. This helps to reduce fading and damage to interior furniture, fabrics and artwork caused by UV exposure.

Insulating space

Low-E insulating glass typically consists of two or more panes of glass separated by a space filled with an insulating gas, such as argon or krypton. This insulating space helps to further reduce heat transfer through the glass by providing a barrier to conductive heat transfer.

Quality Standard

- Subject to BS standard;
- Subject to AS standard;
- Subject to ASTM standard;
- Subject to CE standard;
- Subject to the ISO 9001 standard.

Applications

Specification	Details
Product name	IGU panoramic glass sauna,
Single glass panel thickness	6mm, others 8mm, 10mm, 12mm, etc
Spacer Thickness	12A, others 6A, 9A, 16A, 21A, 23A, 27A
Spacer Color	Normal, black, silver, brown, etc
Size	Maximum reach 3300x7000mm, minimum reach 300x300mm, Support customization
Glass color	clear, ultra clear, Support customization

Process	cutting, edging, tempering, packing, etc
Glass shape:	flat, curved
Production time	10-20day
Capacity	1600SQM/DAY
Packing	Strong plywood crates

Production details

Packing and Delivery

At Shenzhen Dragon Glass Company, we utilize sturdy plywood crates to ensure the safe transportation of our IGU panoramic glass sauna products. Our meticulous packing procedures are specifically tailored to offer maximum protection, thereby ensuring the safety of our products throughout long-distance transit.

If you have any questions or inquiries about our Panoramic Glass Sauna with 6mm Lowe + 12A + 6mm Insulated Glass, please feel free to reach out to us at any time.

At Dragon Glass, we are committed to providing high-quality IGU glass materials for all your projects. In addition to DGU/IGU glass, we offer a variety of [other glass types](#) to suit your needs. [Contact us](#) today to experience the benefits of our products and excellent purchasing process.
