

Telas de privacidade de vidro jateado de 6 mm de alta qualidade

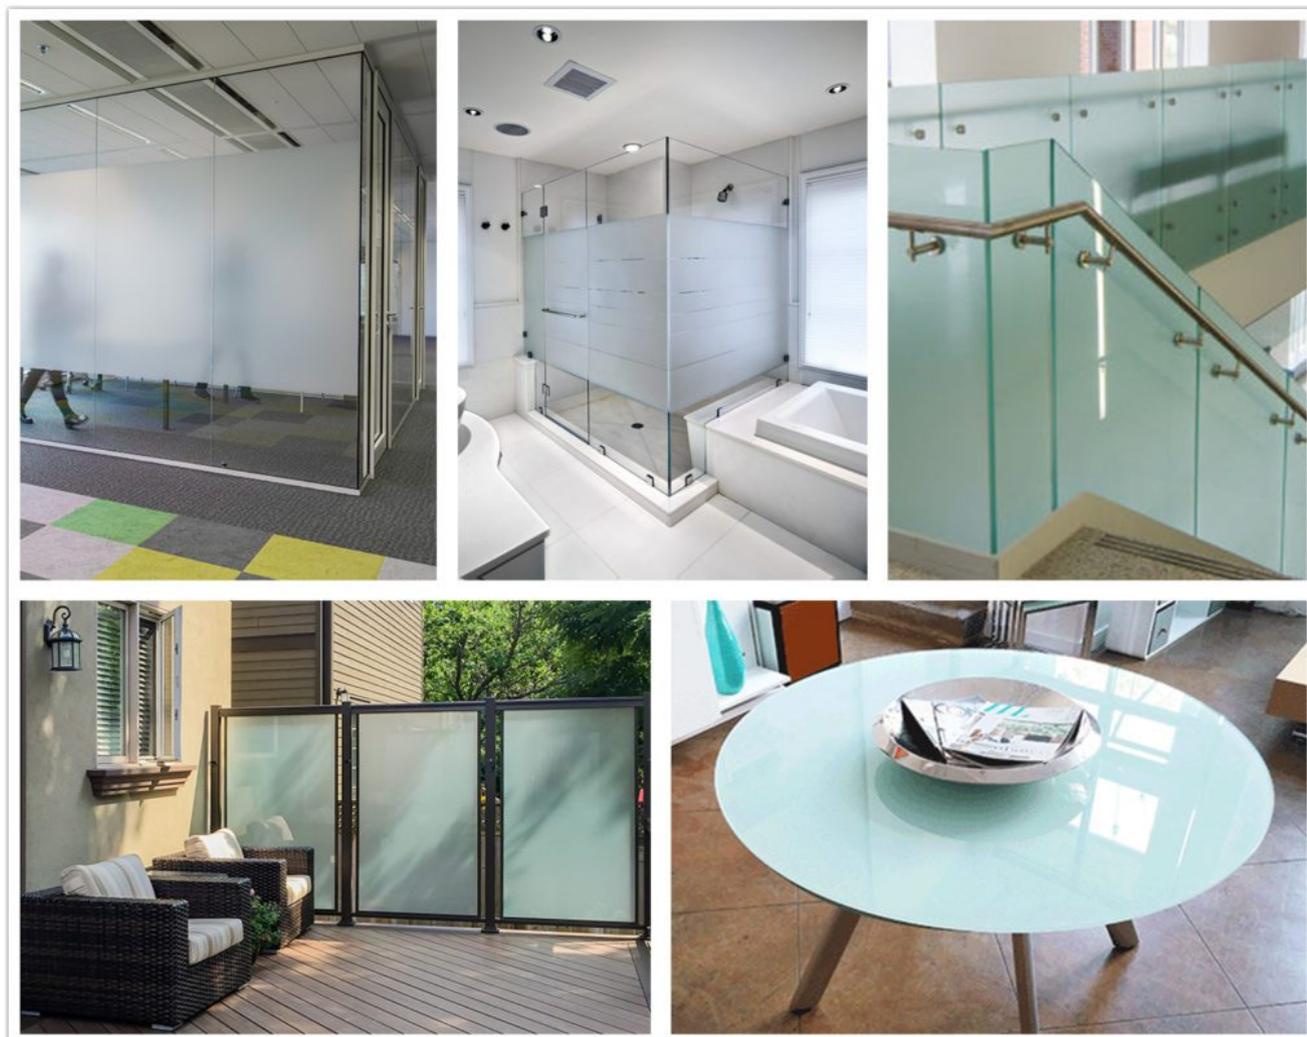

Você já notou que algumas das superfícies de vidro são ásperas? Este tipo de vidro é chamado de [vidro fosco](#) . Existem dois tipos, vidro jateado e vidro gravura. Normalmente, o vidro é áspero de um lado e liso do outro. Como é feito o vidro? Vamos descobrir.

O que é vidro de areia?

O vidro jateado é produzido pulverizando areia em altas velocidades sobre a superfície do vidro. Isso dá ao vidro uma superfície translúcida, que geralmente é mais áspera do que a produzida pela gravura. A profundidade e o grau de translucidez do acabamento do vidro variam com a força e o tipo de areia utilizada, então os padrões e desenhos são personalizados.

Aplicativos

Seis razões pelas quais você escolhe trilhos de vidro de privacidade

- 1. Atratividade:** Os trilhos de vidro são atraentes e parecem mais bonitos do que os trilhos de madeira. Aumenta o apelo visual.□
- 2. Força:** A têmpera torna o vidro cinco vezes mais forte que o vidro comum. Não se preocupe com a quebra de vidro.□
- 3. Segurança:** Mesmo que o vidro se quebre, não é provável que

você se machuque porque é um vidro de segurança.□

4. Durabilidade: O vidro tem uma vida útil muito mais longa do que os trilhos de madeira. Ele pode resistir ao vento, água, arranhões. Permanece em bom estado anos depois.□

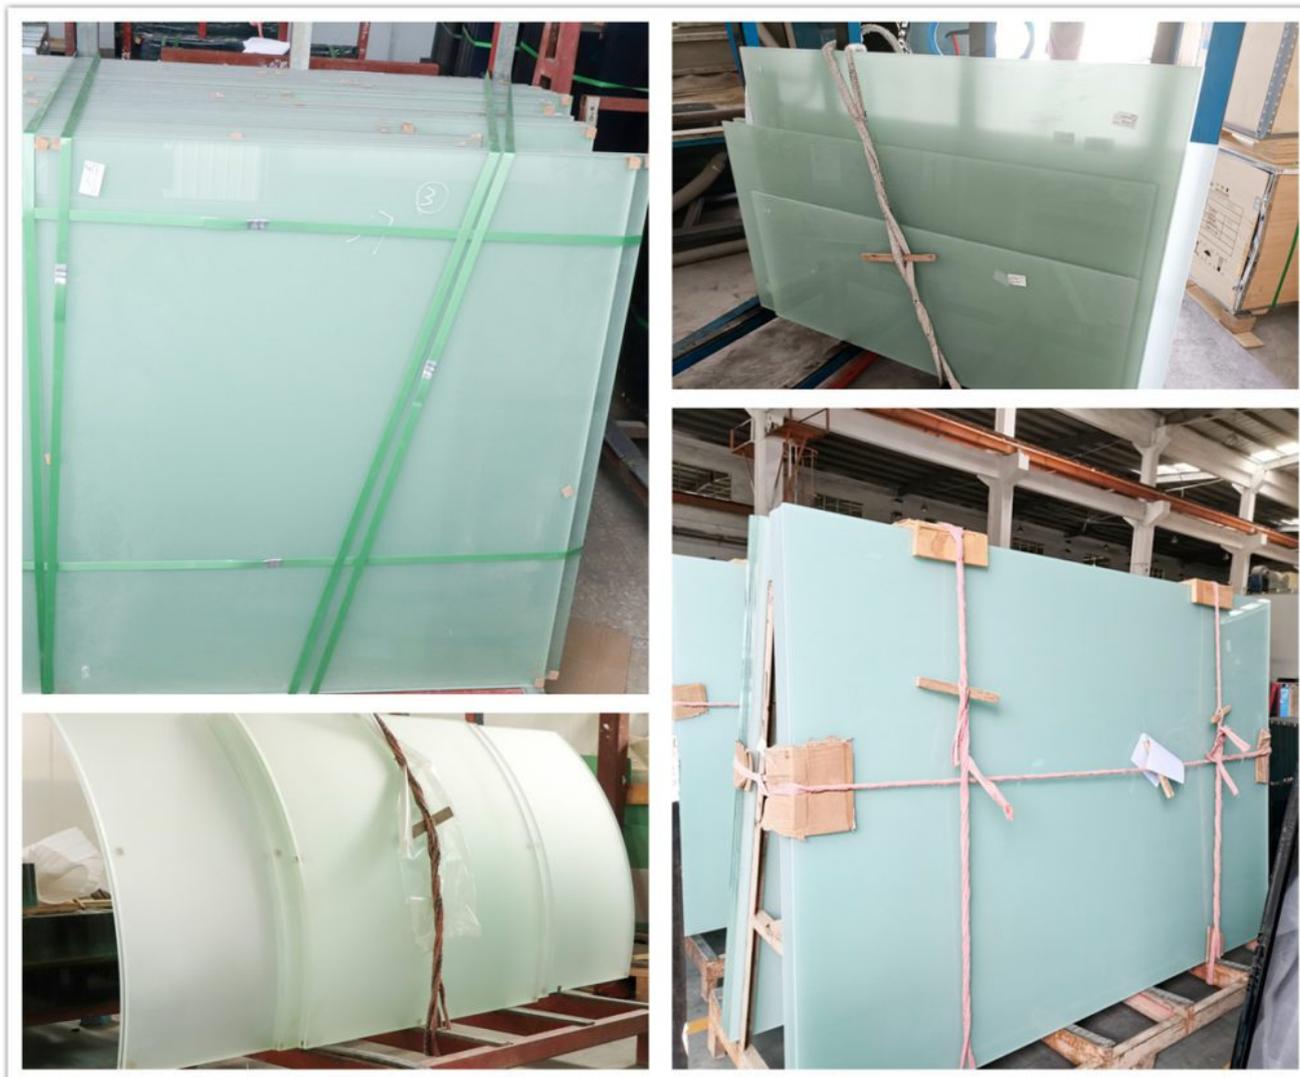

5. Fácil de manutenção: Você está cansado de manutenção de trilhos de madeira? A superfície de vidro é fácil de limpar com água e um pouco mais limpa.□

6. Privacidade: O vidro fosco oferece mais privacidade que separa sua casa dos vizinhos.
