

# **China excellent quality 3mm 4mm 5mm 6mm reflection mirror and glass suppliers**

## **What are 3mm 4mm 5mm 6mm reflection mirror and glass?**

3mm 4mm 5mm 6mm reflection mirror glass are using clear or ultra clear glass, produced by coating aluminum or silver material on the glass, forming a reflection effect.

For the aluminum mirror, there are two types: single coated aluminum mirror & double coated aluminum mirror; double coated aluminum layer can ensure a longer lifespan and better reflection effect than single coated aluminum mirror.

*Reflection glass and mirror product with different coated layers*

**What is the difference between an aluminum mirror and a silver mirror?**

Item	Reflection effect	Price	Lifespan
Aluminum mirror	normal	economical	Relatively Short
Silver mirror	splendid	more expensive	Longer

**Features of SDG reflection mirror and glass products:**

- 1, Super good reflection effect and no distortion;

- 2, Long lifespan and no spots, good anti-oxidizing ability;
- 3, No chips, no scratches, no bubbles, or other flaws.
