

Lisec intelligent plant fully automatic production

Shenzhen Dragon Glass brought in the world's most advanced lisec intelligent plant since 2017, it is the 7th in China and the 1st line in Guangdong province.

Here is a video to show you what is Lisec intelligent plant and how we produce tempered glass, insulated glass fully automatically.

Shenzhen Dragon Glass Lisec intelligent plant introduction:

Completely automatic production process for double insulated glass:

- one day put orders into schedual;
- one week for DGU glass completion;
- one hundred percent product delivery;
- one day for supplement glass production.

The double insulated glass produced by this production line can ensure you super flat [low-e insulated glass](#) surface and high quality. Very suitable for facade or windows projects!
