

# **21.52mm laminated canopy glass with a super elegant silkscreen printed design**

## **What is our elegant design silkscreen printed laminated canopy glass?**

Most of us have seen magnificent canopy glass designs at the entrance to office blocks, shopping centers, hotels, leisure centers, train centers, and subways. Sweeping the facade of a building, they look impressive and aesthetically striking as the sun and the sky is reflected from gleaming glass panels.

The canopy is not only a complex engineering task, it also needs to have an eye-catching decorative effect.

Our elegant design silkscreen printed laminated glass canopy is using inorganic glaze printed on the glass surface and then heat to dried, tempered, or heat-treated. The glaze then is permanently sintered on the glass surface. Then laminate it to obtain durable, safe, decorative, and functional canopy glass. Very suitable for any exterior application.

# What are advantages of silkscreen printed laminated glass for canopy

- **Custom pattern:** In modern architecture, glass is increasingly used as a decorative material. This is possible due to the fact that additional elements can be attached to it. There is no end to the possibilities of patterns and colors with regard to silkscreen printed, which enables a perfect application to the expectations of clients. The realization of an individual pattern, both in the form of pictures and graphics, allows the creation of an unrepeatable composition.
- **Allows maximum light:** A glass canopy allows maximum light to enter the space thus improving the overall look and design of a building. Along with filling in light into the space, the canopy glass roof ensures the coolness of the place at the same time.
- **Super safe:** When the [laminated](#) canopy glass is attacked by the outside, due to the strong toughness of the PVB interlayer, it can absorb and weaken a large amount of impact energy, so it is difficult to penetrate. Even the glass is broken, the broken pieces will shatter into small particles with obtuse angles then adhere to the PVB interlayer, therefore, it will not harm people.
- **High quality & Last longer:** Our silkscreen printed glass has acidic and moisture-resistant features that can preserve the colors for decades. With consistent quality over long-term use. By choosing a glass canopy, you have a durable and long-lasting structure that will keep its look and form for years on end.

## Specifications

- **Production name:** 10mm+1.52PVB+10mm silkscreen printed laminated canopy glass
- **Glass thickness:** 21.52mm
- **Glass color:** Clear, low iron, bronze, blue, green, grey, etc
- **Ink color:** Red, orange, green, blue, black, white, etc
- **Pattern:** Dot, bar, full screen, gradient, other patterns per requirement
- **Max size:** 2440\*3660mm
- **Process:** Cutting, edging, silkscreen printing, tempering, laminating, packing, etc
- **Quality:** CE/ASTM/AS/ISO9001/BS/CE
- **Packing:** Strong plywood crates
- **Capacity:** 1000SQM/day
- **Production time:** 10~15 days

# Quality

- Subject to BS
- Subject to AS
- Subject to ASTM
- Subject to CE
