

smart switchable film PDLC glass floor

How can you feel once you are walking on a PDLC glass floor, suddenly the power switched off?

What's PDLC Technology?

- Can be used for interior or exterior glass applications.
- Switches from opaque (white) to clear in less than a second.
- Can run on standard 110-volt AC.
- Available in a self-adhesive switchable film that can be applied to existing window surfaces.
- Provides total privacy in its opaque state (cannot be seen through).
