

4-19mm Durable Silkscreen Printed Glass Stylish Customized Decorative Glass

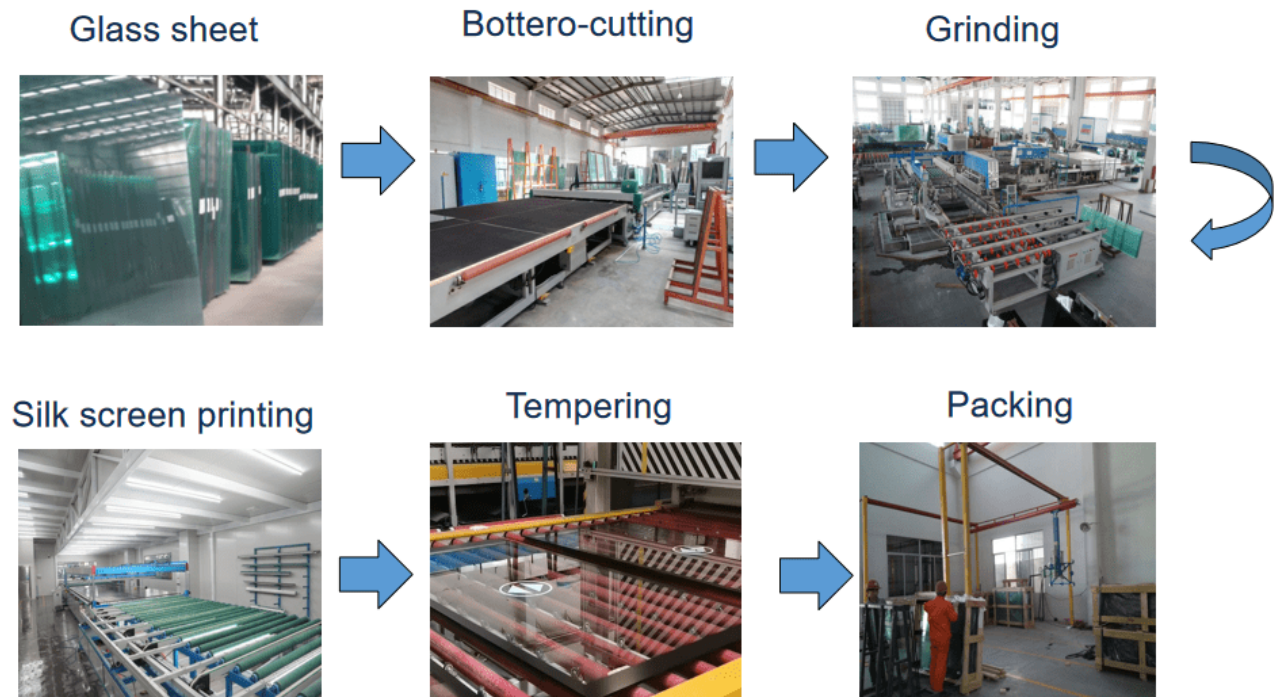

Silkscreen printed glass also call ceramic glass, is a kind of decorative glass.

It is made by printing a layer of ceramic ink on the glass surface through a screen mesh.

After that, the glass will be put into the tempering furnace. Under the high temperature of about 600℃, the ceramic ink combines with the glass permanently. So silkscreen printed glass can be [tempered glass](#). As safety glass, it has all the properties of tempered glass, five times stronger than normal glass, high-temperature resistance.

The glass has many advantages. It is durable, scratch-proof, has solar shading, and with anti-glare effect. It has acid and moisture-resistant features and maintains its colors for decades.
