

Competitive price white laminated glass for French doors, 6.38 laminated glass for sale

What is white laminated glass?

The white laminated glass is achieved by laminating two panels of glass with a milky white PVB interlayer bonded together under a high temperature & high pressure in an autoclave, making a white translucent laminated safety glass.

6.38 laminated glass for white lami door production details:

Here are generally two kinds of 6.38 laminated glass: [Annealed glass\(float glass\)](#) laminated glass & white [tempered laminated glass](#). Both are safety glasses. But tempered laminated glass offers much higher strength with stronger anti-impulse functions.

Annealed glass (float glass) laminated glass:

- Combine the two pieces of 3mm annealed (float) glass together using a 0.38mm □white PVB
- Put it into a high-pressure autoclave

Tempered laminated glass:

- Cut the glass to your desired sizes and then polish the edges and place them into a tempering machine;
- Combine two pieces of 3mm glass together with a 0.38mmPVB interlayer;
- Transfer into a pre-press line and then place into high-pressure autoclave heating up to 100~200 degree temperature and keep 4~8 hours.
- To make the our 6.38 laminated glass high performance and endure a long lifespan

Features□

- **Good privacy effect:** lights can go through but obscure;
- **Super elegant design:** good decoration effect;
- **High strength:** can ensure a strong impact;
- **Super safe:** even if the glass is broken, the glass pieces will adhere to the PVB interlayer, therefore, protecting human beings;
- **Soundproof:** good soundproofing function can isolate the noise by more than 37dB+.

Quality standard:

- AS;
- CE
- ISO9001;
- AS;
- ASTM;
- CCC.
